

PRIYANK BHARDWAJ

Full Stack Software Engineer | Fintech | Python · Django · React · Node.js · Next.js
+91-9911312177 | priyankbhardwaj2477@gmail.com | [LinkedIn](#) | [GitHub](#) | Ghaziabad, India

Full Stack Engineer with 3+ years in fintech — specialising in **Python/Django, Node.js, Next.js, FastAPI, and React**. Built and owned end-to-end systems across 4 repositories — from SCSS design systems and analytics dashboards to Docker-containerised CMS deployments and RBAC middleware. Promoted twice in 2 years. M.Tech in AI.

TECHNICAL SKILLS

Languages & Backend	Python, JavaScript (ES6+), TypeScript, SQL · Django, DRF, FastAPI, Node.js, REST/SOAP, Microservices, Async
Frontend	React.js, Next.js, TypeScript, Zustand, SCSS / Design Systems, Tailwind CSS, HTML5, WCAG 2.1 Accessibility
Data&Cloud	PostgreSQL, MySQL, Redis, SQLite · Docker, Nginx, AWS (EC2/S3), GitHub Actions, GitLab CI/CD, Vercel, Linux
Auth&Security	JWT, Firebase / Google OAuth, RBAC, CORS hardening, HTTPS enforcement, env-aware production config
Testing&Tools	pytest, unit testing, Postman, JIRA, Git (semantic commits), Agile/Scrum, ClevérTap Analytics SDK

PROFESSIONAL EXPERIENCE

Nivesh · Noida, India

Oct 2024 – Present

Software Developer — Full Stack (promoted from Frontend Trainee within 3 months)

- Owned full-stack delivery across 4 repositories (Next.js, Node.js, Django, React/Vite) with 150+ semantic commits spanning analytics, CMS, portal, and marketing surfaces — recognised for Senior-grade impact in FY2025–26 appraisal.
- Engineered analytics backend APIs in Node.js (Promise.all concurrency) with role-based daily/monthly aggregation, CORS hardening, and concurrent DB writes — achieving ~35% throughput gain on bulk event insertion.
- Built React/Next.js dashboards with real-time financial data visualisation and Zustand state management serving 5,000+ daily active sessions across 4 product modules — reducing frontend build time by 30% via reusable component libraries.
- Architected a production Docker stack (App + Nginx + PostgreSQL) for the MarketingCP CMS with docker-compose, custom entrypoint, and a 79-line DEPLOYMENT.md runbook — cutting environment setup from hours to minutes for all new deployments.
- Designed a modular SCSS design system (30+ token files: colours, typography, spacing, animations) adopted team-wide as the standard for all new portal pages — reducing per-component styling effort by ~40–50%.
- Implemented RBAC middleware, permissions module, and template tag helpers for Django CMS, plus Firebase/Google OAuth + JWT session management for the analytics platform — zero auth-related production incidents during appraisal period.
- Led WCAG 2.1 accessibility compliance across 13 components (ARIA labels, skip navigation, semantic HTML, UX4G widget with Next.js route sync) — expanding LimeWealth's addressable market to assistive-technology users.
- Enforced CI/CD via GitHub Actions achieving 95%+ bug-free deployments; Patched HTTPS downgrade vulnerability across 4 files and hardened CORS in 2 backends — zero security incidents from misconfiguration across the full appraisal period.

Wealthzi · Noida, India

Mar 2023 – Sep 2024

Backend Developer (promoted from Python Intern within 7 months)

- Rewrote PostgreSQL queries (indexing, JOIN restructuring) for RESTful/SOAP APIs in Python + DRF handling secure financial data exchange — cutting query latency by 30–40% (1.8s → 1.1s).
- Implemented Redis caching for high-frequency endpoints sustaining 500+ req/min peak loads without DB bottlenecks — slashing API latency by 35% with zero degradation under load.
- Contributed to core Django modules with PEP 8 standards and pytest coverage across a 7-month accelerated ramp — reducing post-launch errors and accelerating release cycles by ~15%.

KEY PROJECTS

Full-Stack API Collection Runner · FastAPI, React.js, TypeScript, Pydantic, SQLite, Vercel + Render · [github](#)

- Launched a Postman-like API proxy (FastAPI + httpx) resolving browser CORS limits with React/TypeScript/Zustand frontend, env switching, history tracking, and auth config — deployed at 99.9% availability on Vercel + Render.

AirCursor Pro — AI Gesture Mouse Controller · Python, OpenCV, MediaPipe, PyAutoGUI, PyQt5 · [github](#)

- ▶ **Engineered cross-platform desktop OS mouse control via webcam hand-gesture recognition** using MediaPipe 21-landmark tracking, QThread multi-threading, and EMA smoothing — **packaged with PyInstaller for standalone distribution across varied hardware.**

Client Event Analytics Platform · Node.js, React.js, PostgreSQL, REST APIs · Confidential

- ▶ **Delivered a high-throughput event-logging + analytics platform for a private client** with Node.js REST APIs processing 100+ req/min at sub-100ms write latency — **real-time behavioural insights dashboard served to client stakeholders.**

EDUCATION

M.Tech — Artificial Intelligence

2025

Maharishi University of Information Technology (MUIT), Lucknow

B.Tech — Electronics & Communication Engineering

Aug 2022

DCRUST, Murthal · *Additional: AI&ML Diploma, DCRUST, 2021*
